

NEW HipZip™

The freedom to download your favourite music and play it anywhere!

iomega® HipZip™ Digital Audio Player

Modern technology is amazing. Take the iomega® HipZip™ Digital Audio Player, for instance. This tiny music player fits in the palm of your hand and lets you download your favorite tunes from the Internet and play them anywhere. Or, you can copy tracks from your own CDs. But while that's pretty amazing stuff, the low price of PocketZip™ disks is simply astounding. Music has never been so compact — or affordable.

The HipZip™ player holds up to 70 minutes of digital audio on one PocketZip™ 40MB disk (previously known as Klik!™ 40MB disks.) Its anti-skip design ensures you won't miss a beat, and Forward or Reverse lets you instantly access the track you want. Plus, you can copy and recopy your disks over and over.

Don't let its compact appearance deceive you. This little machine is packed with sophisticated circuitry, including a customisable equalizer. Whether you kill your brain cells with hip-hop, soothe your soul with Brahms or rock the house with heavy metal is entirely up to you.

The future of digital music has never sounded so good. Get more information about the HipZip™ player at www.iomega.com.

Internet Downloading

Not sure about this Internet music downloading thing? The iomega HipZip™ player comes with all the software you need to easily get in on a good thing. It's software that lets you download Internet music to your hard drive, organise your play list on your jukebox, then transfer the music to PocketZip™ disks. It even lets you create files from your own CDs.
